## Welcome to PME pension fund

Dear [name sir/madam],

Congratulations on your new job and welcome to PME pension fund. You are employed by [variable] and therefore you participate in our pension scheme with effect from [start-date]. Your pension is an important term of employment. In this letter you will find the most important information about your pension.

### What has been arranged for you with PME?

Pension means saving for later. For you, your partner and your children. In the appendix Pension 1-2-3 you can read more about your new scheme. This includes information about what will happen if your situation changes. For example if you wish to cohabit with someone, or if you get married or divorced.

- **'My PME' your personal pension environment**

If you login to My PME with your DigiD you will find extensive information about your new pension. And what has been arranged for your partner and children. Your mailing preference is set as digital, which is the default. Would you like to receive an email whenever you have digital mail? Please fill in your email address within your personal information (if you have not already done so). Change your preference on [www.pmepensioen.nl/mijnpme](http://www.pmepensioen.nl/mijnpme), if you would like to receive information by post instead.

- **Would you like to arrange extra partner's pension insurance?**

Would you like your partner to receive extra pension if you pass away? Then you can arrange an additional scheme called: 'Anw dependant's benefit shortfall pension'. You will find more information and the application form on [www.pmepensioen.nl/anwhiaatpensioen](http://www.pmepensioen.nl/anwhiaatpensioen).

- **Already built up a pension? Maybe you would like to transfer this to PME**

Have you already built up a pension elsewhere? Then you can bring this with you to PME. This is called pension transfer. You will find more information on [www.pmepensioen.nl](http://www.pmepensioen.nl) under 'Nieuwe baan'. Or you can arrange for pension transfer directly via My PME.
